SILOX INJECTION 811NT

injection resin for waterproofing and
strengthening in humidity

Silox NT injection resins are special Epoxy resins for consolidation and structural solidification and waterproofing injections. NT resins revitalize brittle and weathered building materials through injection or drip application. NT = New technology synonym for neither aggressive nor irritant reactive thinners nor benzyl alcohol, this reduces the allergenic potential. Silox Injection 811nt is an excellent crack and pore filler due to extra low viscous design. This combined with long potlife makes Silox 811nt the first choice for structural enhancement. Treated areas top regularly the original strength. Silox 811nt comes with a potlife of 2 h and suitability for wet substrates.

SILOX INJECTION 811NT

BENEFIT

Ultra Low Viscous
Potlife 2h
For Humidity

APPLICATION

Crack Injection
Honeycomb Concrete
Injection
Injection Tube
Contact Grouting
Internal Strengthening
Hollow Screed, Tiles

INSTALLATION

1 Component Pump
Hand Gun

ACCESSORIE

Injection Packer
Injection Pump 1
Component
Jekto Gun 078 Liquid
Drill Hole Mortar
Injection Mortar
Equipment Cleaners
Trennfix
Silox Thix Agents
