SILOX TIEFGRUND 837

Bonding bridge for surface strengthening

Silox Tiefgrund 837 is a special epoxy resin for mineral surfaces. The resin penetrates deep into the structure and enhance and stabiles mineral surfaces. Silox Tiefgrund 837 is a primer and a bonding bridge and suitable for dry surfaces. The main application refers to the preparation of the surface for the following adhesive reinforcement.

SILOX TIEFGRUND 837
