SILOX BAUHARZ 806

epoxy resin for building applications on damp surfaces and GFK laminates

Silox Bauharz 806 is a transparent building resin, suitable for wet and damp surfaces. The elastified material is impact resistant. Surfaces are clear, shiny and stick free. SiloxBauharz 806 is used as bonding bridge on wet concrete or as binding agent for litter layers in parking garages or traffic areas in industrial zones. Repair mortars and polymer concrete made of Silox Bauharz 806 are highly resilient. Cracks or non-moving joints in concrete or screed are casted with Silox Bauharz 806, as well as anchors and machine foundations. Due to a special recipe, the adhesion on wood and metal is as good as the adhesion on mineral substrates.

SILOX BAUHARZ 806

BENEFIT

For Wet Conditions
Adhesion On Metal
Adhesion On Wood
Clear And Shiny Surface
Elastified
Transparent

APPLICATION

Repair Mortar
Litter Layer
Glueing Natural & Artificial
Stones
Joint Mortar
Bonding Bridge
Polymer Concrete

INSTALLATION

Manual

ACCESSORIE

Equipement Cleaners
Duroglass Fleece 1026
Silox Thix Agent
Trennfix 480
Screed Bracket 075
