

Duroglass®1026

Glass fiber mats for laminating work

Duroglass®1026 is a special glass fiber mat for the production of laminates.

Duroglass®1026 can be used for all types of lamination work. Only examples of typical applications are the lining of containers, fiber-reinforced, heavy-duty floor coverings or the strengthening of load-bearing elements in the construction sector and the manufacture of containers, pipes, tanks and other composite components in industry.

Type	Glass fiber mat
Aspect	Staple fiber mat made of E-glass
Fiber bonding	Easily soluble
Weight	0,30 kg/m³ Type 1026.1 0,45 kg/m³ Type 1026.2
Packaging	Rolled goods

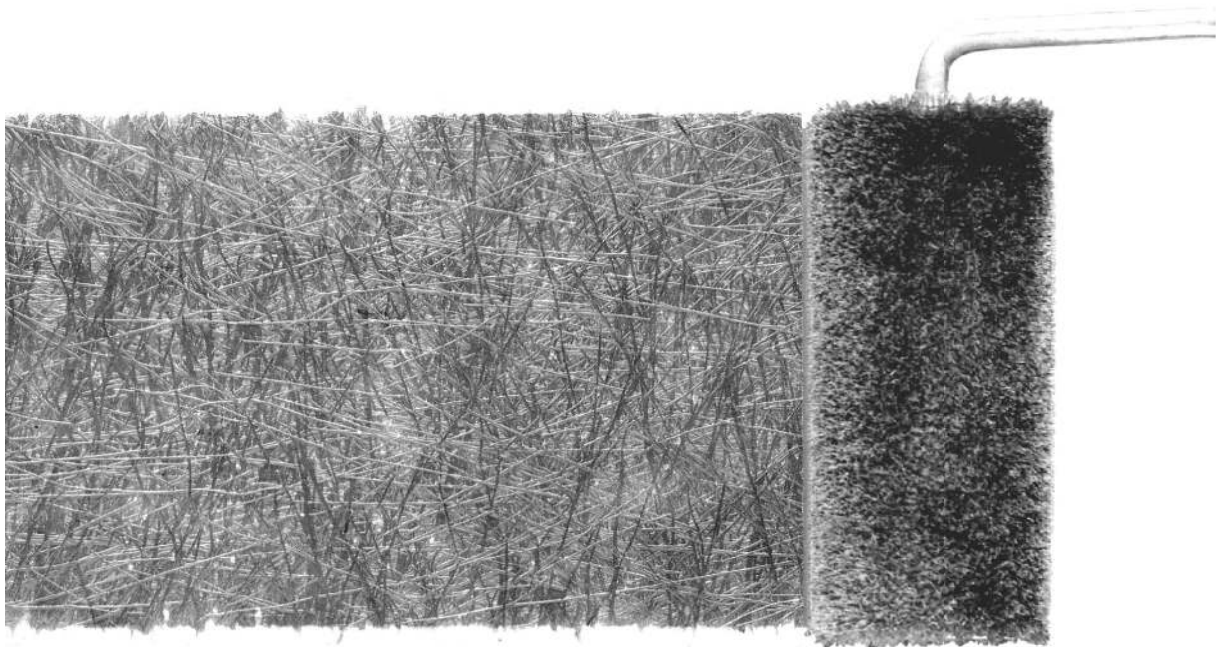

**Storage
Industrial safety**

Duroglass®1026 must be stored cool and in tightly closed original containers. The best before date of each batch is indicated on the product label. Exceeding this BBD does not mean that the goods are unusable. In this case, however, it is recommended to check the properties required for the intended use.

The product should be stored in such a way that it is not accessible to children and unauthorized third parties.

The product does not pose any particular dangers. Good room and workplace ventilation must be provided.

A safety data sheet is available for the product. It contains all current information on the safe handling and disposal of the product. We recommend that this safety data sheet be made available to all those who handle the product.

These technical information describe the present-day state of knowledge these product. They should only inform about the possibilities of application and could not release the applicator of his commitment to check the possibility to use the product for the required application. Information for processing can be found in processing instructions of our product. Information about safe handling can be found in our current safety data sheet.
