

HydroProtect 1107-V und 1107-S

New generation of sealants and corrosion protection for steel bolts.

ARCAN presents under the label HydroProtect sealant systems for steel bolts in-railway sleepers.

HydroProtect Systems prevent steel bolts from rust and corrosion. The creamy Hydroprotect material protect the surface of steel bolts and the hole inside the railway sleepers. Usually after years both parts are firmly bonded with corrosion and rust. Changing and maintaining is getting harder and harder and sometimes damages are unavoidable due to firmly bonding of the steel parts.

This is where HydroProtect comes into the game. All treated surfaces will be protected and this guarantees a smooth and stress free maintaining job.

	Corrosion protection
	Permanent hydrophobic
	Permanent soft and creamy consistence
	Stress free maintaing work - no seizing up
	Easy change of railway sleepers or bolts

HydroProtect is available as version S and version V. Both types come with active corrosion properties and lubricate the surface of steel parts perfectly. Hydroprotect is hydrophobic and prevents steel of water contact this avoids seizing up of steel parts perfectly.

HydroProtect - 1107 S

HydroProtect - 1107 V

The difference between both types is the better chemical resistance of HydroProtect S. Type S is chemical inert.

HydroProtect could be delieverd in buckets or more comfortable in cartridges.

These technical information describe the present-day state of knowledge these product. They should only inform about the possibilities of application and could not release the applicator of his commitment to check the possibility to use the product for the required application. Information for processing can be found in processing instructions of our product. Information about safe handling can be found in our current safety data sheet.
