

## BentoColl®305

### Special adhesive paste for bentonite swelling tape

BentoColl®305 is a bentonite-containing, paste-like adhesive, filled in plastic cartridges for commercial Hand guns. The product adheres perfectly to concrete and similar substrates.

BentoColl®305 is a construction adhesive for Bentonite swelling profiles. Glue line made from BentoColl®305 swell by contact with water due to the bentonite contained in the product and support the sealant seal.

#### Product specification

Packaging:	Solvent-based adhesive in cartridge
Aspect:	Grey, pasty with a faint odour
Mixing ratio:	Ready to use
Density:	Approx. 1,65 g/ml
Shelf life:	9 Months, cold and dry storage

#### Processing

The product is ready for use after cutting off the cartridge tip and screwing the nozzle cut to the appropriate diameter onto the cartridge.

BentoColl®305 adheres excellently to all clean, dust and grease-free surfaces and also to matt-moist concrete. The glue will bind in a short time. At high temperatures or perceptible air movement, a thin skin forms comparatively quickly on the applied adhesive, which disturbs the wetting of the swelling tape surface by the adhesive. It is recommended to move the profile somewhat longitudinally when inserting it into the adhesive bed to rip open this skin. For horizontal fixing thicker and heavier tapes is recommended to fix the profiles with a nail about every 50 cm to prevent slipping in the setting phase of the adhesive.

The product should be stored in a cool and dry place, in a ventilated room, and so that it is not accessible to children. Fire, open light and radiant heat sources are to be avoided in the storage room. For further and detailed information on the safe handling of this product, please refer to the safety data sheet for BentoColl®305.

These technical information describe the present-day state of knowledge these product. They should only inform about the possibilities of application and could not release the applicator of his commitment to check the possibility to use the product for the required application. Information for processing can be found in processing instructions of our product. Information about safe handling can be found in our current safety data sheet.
