

## **DustControl®984**

Stabilizes surfaces, binds dust and sand

DustControl®984 - an impregnation and binding agent for the consolidation of finely grained minerals, dust and loose sands.

Easy to use: thin fluid, ready to use as supplied, DustControl®984 is applied thickly to the surfaces to be protected by spraying, then dries very quickly to a tough, elastic, practically invisible product. DustControl®984 binds loose particles, they are immobilised, and even loose sands and fine gravel are stabilised.

- binds airborne dust from spoil heaps and landfills
- stabilises dunes
- prevents wind transport of loose sand
- protects against erosion

### **DustControl® -**

DustControl®984 is not a hazardous substance, physiologically absolutely harmless, climate-neutral and contains no solvents or other substances critical for the environment. The germination and growth of plants is not significantly affected by surfaces treated with DustControl®984, in many cases it is even facilitated by the substrate stabilised with the product.

### **Processing**

DustControl®984 is a low viscosity product. The binder is dissolved in water and can be applied with conventional spraying equipment by spraying or atomising. The quantities applied are naturally dependent on the structure and properties of the substrate and must be determined by testing.

### **Securing an embankment**

**Properties**

Nature	Self-crosslinking polymerblend
Aspect	Milky, opaque emulsion
Odour	Weak, fruity
Density	Approx. 1,05 g/ml
Viscosity	Approx. 30 - 60 cP
Cleaning/thinner	With water
Transport and storage	Protect from frost
Shelf life	6 months, originally packed

These technical information describe the present-day state of knowledge these product. They should only inform about the possibilities of application and could not release the applicator of his commitment to check the possibility to use the product for the required application. Information for processing can be found in processing instructions of our product. Information about safe handling can be found in our current safety data sheet.
