

Jekto M-1

Electric plunger pump injection systems

Jekto®M-1 is a light, powerful and very reliable injection device with electric motor. The pump is suitable for injecting low-viscosity injection materials with a sufficiently long working time.

- **Easy handling and transport**
- **Small and compact**
- **Injection pressure continuously adjustable**

Suitable Injection materials

Jekto M-1 is suitable for injection resins with a long working time. These are classic 2 component resins, waterstop foam that reacts only on contact with moisture. Particularly suitable are the injection resins of the Integral line, which are ready to use and for which the pump does not need to be cleaned during breaks in work.

Technical data

Power Supply	: 230V / 50 Hz
Delivery rate	: 1,9 l/min with free flow
Maximum operating pressure	: 200 bar
Material reservoir	: 2 liter
Total weight	: 12 kg
High pressure hose	: 7,5 m
Injection lance	: without-off valve and coupling

The machine is delivered completely equipped with the necessary injection accessories and can be used immediately.

These technical information describe the present-day state of knowledge these product. They should only inform about the possibilities of application and could not release the applicator of his commitment to check the possibility to use the product for the required application. Information for processing can be found in processing instructions of our product. Information about safe handling can be found in our current safety data sheet.
